

Lake WahWashKesh

CONSERVATION ASSOCIATION

— SPRING 2012 NEWSLETTER —

President's Message

On behalf of the Executive I hope everyone had a good winter and you are now looking forward to another fabulous year at Lake WahWashKesh. Please find enclosed with this newsletter an application form for **renewing your membership** and **also purchasing the revised Car Parking Permits and Lake Access Permits**. We are relying on the revenues from memberships and permit sales to pay for the new parking lot over several years. Please also note that we have not raised the membership fees or the permit fees in many years and are hoping to continue to expand our membership rather than raising fees. ***Purchasing your memberships and permits in advance also makes the treasurer's job much easier at the Annual General meeting, this year to be held at 9:30am on Saturday, August 4 in Bennett's Barn.***

As many of you already know, the Association created a Facebook page titled "The Lake Wah-Wash-Kesh Conservation Association". Since then several great pictures have been posted on the site and information such as when the ice went out is posted regularly. We invite you to check out this site and "like" it if you choose! We have recently posted on the site an announcement from the calendar committee concerning the calendar project and the request for photographs of the lake. Please also see the same announcement inside this newsletter. The Association Executive feel that Lake WahWashKesh is beauti-

ful in all seasons but many cottagers are unable to see all four seasons; this calendar will showcase beautiful photographs of Lake WahWashKesh in each of the 14 months covered by the calendar.

I had anticipated hearing the result of our application to the Ontario Geographic Names Board, concerning our application to rename Pine Ridge Point to Hayward Point, to honour the Hayward family. Unfortunately, the application is still with the Board and no timeline is available for a conclusion. We will keep you advised of any developments with this project.

The process of getting approval for the old dump site behind Bennett's to be converted into a helipad landing is proceeding slowly. Over the winter I discussed the proposal with a representative of the Ontario Ministry of the Environment who sent me a 30 page application. After reading the application, I felt that because we are not putting any buildings on the site and we are not covering the ground with a solid surface such as asphalt, we do not need to complete an application. I

have gone back to the MOE representative with this view but have yet to hear back from her. Again, we will keep you advised of any progress.

For those of you who attended last year's corn roast, you may remember we experienced a problem with the grate that held up the barrel of boiling water bending in the middle and almost collapsing. In the fall I mentioned to Nick Thomson that we were looking for a 4' by 4' grate of heavy steel that would withstand the weight of the barrel and water. Nick has very kindly donated a piece of grate that more than meets our needs. I will deliver it up to Straub's Beach (or Wigston's if the water is high) during the summer after discussions with the property owners. *Nick has also become an advertiser with this issue; please see his ad farther on in the newsletter. Thanks Nick!*

Best wishes for a safe, healthy, and happy summer from your Association Executive.

Fish Enhancement Committee

The Committee would like to report on two periods of spawning bed monitoring work done since last fall.

The first session was done by Ken Webb on a volunteer basis between October 8 and November 24, 2011. The spawning bed was monitored by Ken Webb for 23.5 hours during this period. Unfortunately, only one pickerel and one lake trout were observed during this period. These poor results may be the result of varying air and water temperatures and lake water levels.

A big THANKS! to Ken Webb for his work on this monitoring in the middle of the night!

The second session was done this spring by Edgar and Adam Chambers and was much more involved because there are three pickerel spawning beds in Lake WahWashKesh that have been rehabilitated and two of those are accessible only by boat. This session covered six days between April 9 and April 15, 2012 and again was done between the hours of 11:00pm and 4:00am. Again, air and water temperature readings were done at each of the three sites (Lovesick Rapids, Farm Creek, and Gooseneck).

The results of this monitoring were also very poor since only two bass and one sucker were observed. Again, this may be the result of wildly fluctuating air temperatures and fluctuating water temperatures as well.

The committee is planning to meet with Bart Brown of the OMNR in Parry Sound to discuss these findings and hopefully get more credible results next year. A large portion of the personnel costs and the gas costs will be covered by a CFWIP (Community Fish & Wildlife Improvement Project) grant from the OMNR; the balance can be covered by funds raised by the Committee. *Again, a big thanks to Ken Webb and Ed and Adam Chambers.*

Have a safe and happy summer and good fishing!

Ken Taylor (Chairman), Ed Bennett Sr., Don Comrie

Grave Restoration Rejected

"I always liked Dead Man's because the view from it was so slightly. Uncle Herb and I use to land right on the rocky point not far from the grave of the Dead Man. At the time there was a cross at the foot of his grave which had the inscription, 'Canada mourns one of her favourite sons.'" This is a quote from an April 28, 1973, letter written by Debbie (Swift) Hummel's great-aunt Molly, wife of Herbert Dyer Swift of Cameron Island.

The grave is that of Jack McCloud, a river driver, killed during the days of lumbering and floating logs down the Magnetawan. Ken Hayward remembered boots hanging from the cross which said, "Canada mourns one of its sons."

During the autumn of 2011 there was correspondence between the Association Directors and Debbie Hummel regarding restoration of this historical site and placing of a marker. Debbie replied, "I would certainly be supportive and appreciative of the Association's effort to place a memorial plaque at the site."

The Hummels contacted their insurance company and were advised February 23, 2012, "... if the property were to be opened to the public ... and the Lake

Association were to restore the grounds and do the work ... (this) would be a big liability exposure ... and we would have to look at placing the cottage coverage on a Commercial policy." The Directors of the Wah-Wash-Kesh Conservation Association sincerely thank the Hummels for their research and cooperation. However, we do not wish to expose a property owner or visitor to the lake to any risk. Consequently the proposal is rejected. Debbie wrote on February 27, 2012, "... we support this idea in theory ... We have considered personally restoring the grave site as we are interested in reserving the history of the island."

In an earlier correspondence, Debbie indicted that Ken Hayward recalled another grave with boots and cross further down river on a bluff near Deep Bay. Perhaps we should determine the location of that grave, discover whether it is on private or public land and research its history.

Please share information, photographs or cottage log records of this second grave with the Association directors.

Jacquelyn Morgan

Lake Access and Car Parking Permits 2012

We are expecting the new parking lot to be operational by late June of this year. Currently the half load season is in effect and thus placement of fill etc. will be after the end of May. The status right now is that the area is cleared and ready for fill. Clearing and stumping took place in the warm days of January after receiving final MNR approval in December 2011.

All cars and truck parking at Bennett's Bay and Indian Narrows require a displayed 2012 Car Parking Permit. This permit entitles you to park in all former locations plus in the new parking lot once it is functional. Parking Permits (for all of 2012) can be purchased through the Association or at Bennett's store for \$25. We plan on funding the cost of the new parking lot with this parking permit revenue.

The Municipality has approved two handicap parking spots at Indian Narrows and two handicap locations at Bennett's Bay. Parking in these locations *will require a displayed provincial handicap permit – plus a 2012 Parking Permit* provided by the Association. You will be ticketed if you are parking without the required permit. The handicap location signs should be placed in May 2012.

Membership Renewals, Lake Access and Car Parking Permits

We have already received a number of membership renewals as well as *Lake Access and Parking Permits*. Based on what I have received so far there may be a bit of confusion. While it is positive to receive the *Car Parking Permits*, with revenue directed to offsetting the construction cost for the new lot, there is a reduction in *Lake Access (dock) Permits*. The *Parking Permits* are meant to be in addition to the *Lake Access*, not instead of. This is why we also introduced a combined payment for both at a discount. Please help support the new parking initiative, but not at the expense of our dock funds.

You may also have noticed that the renewals to date have been sent without a sales receipt. This is due to the fact that I was updating our accounting software to QuickBooks 2012 and in conjunction with this was working with our Accounting firm to complete the 2011 statements. During that time I did not have access to the program. We are now back in business so if anyone needs a written receipt for a previous renewal feel free to drop me an email (see contact info on the back cover) and I will send it out.

Along with the new and existing members from last year we are mailing to those who have dropped off from 2009 and 10. If you are receiving this and are not a current member please consider renewing now. As part of our membership drive we are again engaging the services of our membership team Pat and Cheryll. You may see them at your cottage or one of the docks this summer.

Rob Slykhuys, Treasurer

The new **2012 Lake Access Permit** has replaced the former "Dock Permit". This **"Lake Access" Permit** allows for the launch and removal of your boat from the Lake either at Bennett's Bay or Indian Narrows as well one can use either dock for loading and unloading as needed. Lake Access Permits can be purchased through the Association or at the Bennett's store for \$30. ***This new Lake Access Permit does not allow for a boat to be parked at either dock for an extended period of time (ie. all day or overnight).***

This permitting plan is a very simple and thus requires the support and cooperation of all users. Throughout 2012 we will evaluate this permit plan and listen to input from users so that needed improvements can be made for 2013.

Have a great summer at Lake WWK.

Dalton Ferris

**See page 15 of this newsletter for your
2012 Association Membership and the two Permits**

Water Quality Monitoring on Lake WahWashKesh

I want to thank all the volunteers on WahWashKesh Lake who collected water quality samples in 2011 as part of the Ministry of the Environment (MOE) Lake Partner Program. The data for 2011 has not been posted due to personnel changes in the MOE, but should be available shortly. Hopefully, I can present this information at the Annual General Meeting this summer and in the fall 2012 newsletter. And to all volunteers sampling water quality on our lake in 2012, thanks for doing this important task that helps to monitor the health of WahWashKesh Lake.

The Magnetawan River Watershed Association is waiting to hear about receiving a grant to purchase a portable water quality meter. If obtained, this meter will be shared among lake conservation associations within the watershed. The meter will measure temperature, dissolved oxygen, and other parameters that can detect deleterious changes in water quality. This meter can take measurements to depths of 30 meters. Over the years, the Ministry of Natural Resources has worked with the WWK Conservation Association to enhance the native lake trout population. Lake trout inhabit deep waters in our lake and have critical water temperature and dissolved oxygen requirements. The measurements taken with this meter can assess these requirements.

If the Magnetawan River Watershed Association obtains this meter, I will work with members of the WWK Conservation Association to set up locations to take water quality measurements in our lake. The WWK Conservation Association has not detected changes in our water quality over the past 10 years. The largest concerns affecting our waters include inputs from the Magnetawan River upstream of WWK lake and faulty septic systems that can leach nutrients such as phosphorus and nitrogen into the lake.

**Mike Maceina, Director and
WWK Water Quality Coordinator**

Membership Drive

Once again this year the Wah-Wash-Kesh Conservation Association will be conducting a membership drive. Our focus will be to encourage all past and current members to renew again for 2012.

The executive has approved the hiring of Cheryl & Pat Costigan, who did a fantastic job for us last year, to canvas for the association. Cheryl and Pat will be canvassing cottagers who have been members in the past but have not renewed. In 2011 we had 39 members from 2010 who did not renew. They will also be helping to renew Lake Access Permits at government docks. ***Please see the Membership, Dock Permit and Parking Permit forms at the back of this newsletter.***

Thank you for your support!

Lake WahWashKesh Calendar Project

Your association executive is planning on designing a lake calendar. It will run from December 2012 – January 2014 and will feature photographs of our lake taken throughout the year by cottagers. This is a chance to have your photographs published in a calendar! Lots of lake cottagers do not get the opportunity to see the beauty of our lake during the winter months. Through this calendar we can share the beauty of our four seasons with all cottagers.

The executive would like to have the calendar available for sale by the annual general meeting in August, ***so if you have one favorite picture you would like to share, please send a copy to: patriciaforbes@rogers.com.***

By restricting the number of entries to one per cottager, hopefully, we'll get a good representation of photographers on the lake. Remember with 14 months to fill, the photographs need to be not just "cottage season" months. **Photographs must be received by June 15th.**

The rules for entry are:

- The photograph you send must be jpeg
- Include your name (so you can be given credit if your photo is published)
- Identify the photograph's location on the lake, year and month (if possible) the photo was taken
- Send a short note giving the

If there is a person (other than yourself) in the photograph, or if you use the interior of a cottage that is not your's (the photographer) you must, also, get the cottage owner's permission to use the photograph. Please be very careful of sending in pictures including children. Do not send pictures of a single child. We know that they make great cottage photo subjects but we have to be so careful on their behalf. *The calendar is meant to reflect the beauty of nature of our very special lake.*

Your calendar committee (Pat Forbes, chair, Elsa Richards, Christa Downes, and Don Comrie) is looking forward to having to make some difficult decisions choosing only 14 fabulous pictures for our first Lake Wah-Wash-Kesh

Association calendar! Have a wonderful spring and early summer.

Pat Forbes

WWK Conservation Association permission to use your work in the calendar (most of these words must be included so that we will all know the photographs will not be used by the Association for anything other than the calendar.)

Green Corner *by N. Glenn Perrett*

As we look forward to another fun summer at the lake, these products can make the experience more enjoyable!

Sweet & Easy Snack Maker (Lee Valley)

Enjoy popcorn? Like sweet, gooey snacks? You may be looking for the *Sweet & Easy Snack Maker* from Lee Valley without even realizing it. This handy machine makes popcorn on the stove top and minimizes burning kernels as its "direct-drive crank mechanism" allows you to stir the contents. The machine also comes with a 23-recipe booklet for flavoured popcorn and other tasty snacks. We tried a recipe involving melted chocolate, peanut butter and peanuts and it was very good - and easy-to-make. We're looking forward to trying some of the other recipes in the booklet.

Thumb-Lite (Lee Valley)

Ever need extra light? This tiny (3/4" wide) LED flashlight features an adhesive backing allowing it to be mounted to a key or kept in a purse, breaker panel box or similar location. The stick-on LED flashlight is powered by two "button-cell batteries".

White LED Magna-Lite Reader (C. Crane Company)

Occasionally I need help reading small print and this White LED Magna-Lite Reader works great. The magnifying glass with light uses four "AA" batteries and features a "2 power lens" along with a "4 power insert". The magnification, combined with the light makes reading small images and writing, like maps, much easier.

Pocket Shopping Bag (Lee Valley)

The Pocket Shopping Bag is not only convenient (weighs only an ounce and fits in your pocket), it can save considerable garbage. The "Canadian-made" reusable bag is made of polyester with a "reinforced bottom seam" and is approximately the size of a regular plastic grocery bag.

CC Solar Observer (C. Crane Company)

Whether it is for emergencies when the power goes out or you simply want a good eco-radio where you can enjoy tunes by

the lake or in the cottage, the CC Solar Observer delivers. Some of the features of this radio include being powered by solar, wind-up, AC power or three "AA" batteries. The solar powered radio gets AM reception along with FM, the Weather band and a stereo headphone jack. The radio can even be used to "charge a cell phone" and features a built-in, 3-LED flashlight.

Cozy Hemp Harness and Hemp Leash (Planet Dog)

For four-legged family members Planet Dogs offers lots of eco-friendly products. Some dogs do better with a harness as opposed to a collar and hemp is a strong, eco-friendly material. The Cozy Hemp Harness is adjustable and fleece-lined and is available in three sizes and in five colours. This harness goes well with Planet Dog's hemp leash that features a fleece-lined handle and which is available in five colours.

Book Reviews by N. Glenn Perrett

This column contains useful books for the cottage, something for children and a festive title or two.

Rachel Carson and Her Book That Changed the World

Laurie Lawlor, illustrated by Laura Beingessner

Holiday House

2012, 32 pages, ages 6+

ISBN: 9780823423705

It has been 50 years since Rachel Carson's important book, *Silent Spring*, was published. In this book Carson bravely warned about the dangers of chemicals including the use of pesticides and herbicides. In celebration of the 50th anniversary of this groundbreaking environmental book there is the children's biography *Rachel Carson and Her Book That Changed the World*.

Written by Laurie Lawlor and illustrated by Laura Beingessner, the informative children's book looks at Rachel Carson's life and her major contributions to the environment through her work and her important book *Silent Spring* that was first published in 1962.

that, "The average child spends more than 30 hours in front of television and electronics a week and gets only four to seven minutes a day of unconstructed playtime outside." To address these concerns and the many benefits of exercising outdoors, Cohen has written *15 Minute Outside: 365 Ways to Get Out of the House and Connect With Your Kids*. The majority of the book is written with preschool to elementary

Fantastic Ships

Gaby Goldsack, illustrated by Lee Montgomery and Anthony Williams

Silver Dolphin Books, 2011, 12 pages, ages 7+, ISBN: 9781607102403

Children can be hands-on with this book as they learn about history and ships in *Fantastic Ships* which contains historical photos, detailed diagrams, working models of five ships along with comic strips that tell the stories of the ships. Topics in the book include when sailing ships were invented, the Santa Maria, Viking longships, Mutiny on the Bounty, RMS Titanic and more.

15 Minute Outside: 365 Ways to Get Out of the House and Connect With Your Kids

Rebecca P. Cohen, Sourcebooks

2011, 228 pages, ISBN:

9781402254369

According to Rebecca Cohen, "One in three children is obese." She also says

aged children in mind. Cohen provides lots of suggestions for games, projects and ways to enjoy nature for each month of the year. Besides the fun and

quality time spent with your children, exercising outdoors improves a child's concentration, lessens aggression and increases levels of vitamin D. Whether it is stargazing in January, making a bird feeder in March, planting vegetables in May or creating your own drive-in in July, you and your children will enjoy and benefit from getting outside

and participating in some of the 365 activities contained in this book.

Peterson Field Guide to Moths of Northeastern North America

David Beadle and Seabrooke Leckie

Houghton Mifflin Harcourt

2012, 615 pages, ISBN:

9780547238487

I remember watching moths who clung to the screen door at my parents' cottage. I didn't know any of the species back then but with the book *Peterson Field Guide to Moths of Northeastern North America* I should be able to identify many of the moths I happen to meet in the future. According to the authors in the

Book Reviews by N. Glenn Perrett

Introduction there are more than 11,000 species of moths in North America and this book features close to 1,500 species of the approximately few thousand species that live in northeastern North America.

For the different species there are photographs along with "...basic information that will help in reaching an identification."

Regional maps along with sections on photographing moths, identifying moths, moth taxonomy and moths and conservation.

Peterson
Field Guide to
Moths of

Northeastern North America is a good field guide to add to your collection.

Willie and Joe: The WWII Years

Bill Mauldin, Fantagraphics Books
2011, 720 pages, ISBN:
9781606994399

Willie and Joe: The WWII Years contains the complete collection of Bill Mauldin's army cartoons that were published in newspapers, magazines and books between 1940 and 1945. These World War II cartoons provide the reader with a glimpse of what army life was like. *Willie and Joe: The WWII Years* is more than a book of cartoons by a two-time Pulitzer Prize winning cartoonist, it is a significant book about history.

The Complete Peanuts 1983-1984

Charles M. Schulz, Fantagraphics Books
2012, 344 pages, ISBN:

9781606995235

Ahh, the cottage, a comfy chair and Charles M. Schulz's Peanuts gang. Now that's relaxing! The latest volume is *The Complete Peanuts 1983-84*. This book has some familiar storylines like Lucy

pursuing Schroeder and some new ones such as Snoopy's brother Spike requiring help from attacks by coyotes (they're attacking him with rubber bands!) As with the other Peanuts books this one makes a nice keepsake - and a wonderful to book to leave out for guests.

The House of Silk: A Sherlock Holmes Novel

Anthony Horowitz, Mulholland Books
2011, 294 pages, ISBN:
9780316196994

I just read my first Sherlock Holmes novel - and it wasn't written by Sir Arthur Conan Doyle. *The House of Silk* was written by Anthony Horowitz who is the first author since the death of Doyle to be sanctioned by his estate to write a Sherlock Holmes story. And what a good novel it is. The story occurs in London in 1890 with an arts dealer visiting Sherlock Holmes requesting their assistance to solve a case about a criminal who has followed him from the United States. What ensues are murders, strange events and horrific crimes involving some of Britain's most influential people. Excellent murder mystery!

GARDEN CITY HUNT CLUB CELEBRATES 100 YEARS

In 1912 Dr. A.G Ludwig M.D., James A. Stewart and Edwin Secord all from St. Catharines travelled north to Deer Lake (later Lake WahWashKesh) for 2 weeks of deer hunting. These three men were the founding members of Garden City Hunt Club. They travelled from St. Catharines by train, arriving at Ardbeg early in the morning and were met by Alfred Hayward. After having breakfast at Hayward's they were transported by horse and wagon to Gooseneck Lake, then by barge to the north east of the lake, then Mr. Harrison met them with team and wagon and portaged them to his landing on Lake WahWashKesh. Mr. Edward Bennett (Clifford's father) took them to the north channel of Deadman's Island. They pitched a tent about where the Morgan cottage sits now. They camped there for approximately 3 years. In 1915 they camped on Evergreen Point about where Ross Willett's cottage now stands.

In 1919, Glad Secord returned from four years of service in the 1st Great War in England, France and Belgium. That fall he made his first trip hunting with the above named three on Lake WahWashKesh. For the next 58 years, Glad spent every fall there hunting and 3 to 4 weeks in the spring and summer fishing.

Glad was one of a kind, a character to say the least, I doubt if there are many on the lake who would remember him.

They traveled by train until 1929. As roads improved and cars and trucks became more reliable, they

In 1952 the original cottage burned to the ground (cause unknown). In October the present cottage was built. About 1960, a survey was made in that area of the lake and it was discovered that the cottage had been built on property owned by Cliff Bennett. A satisfactory agreement could not be reached by the two parties concerned, so in 1962 Guy Hayward moved the cottage about 150 feet east on the property. In 1964 an addition of 2 bedrooms and a bathroom were added, completing the building to its present state.

started to make the trip by automobile, using Harrison's Landing and Parker's Bay Landing.

In 1936 they purchased the present property from Morton's Point Ltd for the sum of \$50.00. In the spring of 1937 a cottage was built about where the present one sits.

has just recently been completed. The mode of transportation has changed drastically both on land and water. I remember coming across in a wooden flat bottom boat with a 10 hp motor on it. There was only a path up the hill through the long grass, we decided to clean that up and now we have to mow the grass.

At one time there was a hand pump for water in the cottage, next we had a gravity fed system and the advent of hydro finally a pressure system. The hydro was probably the biggest improvement that has been made, making life a whole lot easier. How did we ever play cards with those propane lights? On the other hand the purchase of the Trecker (4 wheeler) sure makes getting all the supplies up the hill a breeze.

The annual 24th of May fishing weekend still continues and most winters so does the November hunting trip. There are a lot less fish to be caught and fewer deer. But you still can't find a more peaceful (except for the seadoo's) and relaxing place to go than Lake WahWashKesh.

TROUT with BRUSCHETTA

Trout Fillets, with skin on
Bruschetta mix, fresh from
the deli

Spread the bruschetta mix over the fillets, while you are heating your BBQ grill to low temperature.

Place fillets directly on grill and cook on low heat, with lid closed for approximately 25 minutes, depending on thickness of fillet. The trick is to not overcook the fish.

When done, fillets will lift right off the skin.

Carey Frew (secretary)

BEST-EVER BLUEBERRY PIE

- 3 cups blueberries
- 3/4 cup white sugar
- 3 tbsp lemon juice
- 3 heaping tbsp cornstarch (mixed with a little water)
- your favorite pie crust

Preheat oven to 350 degrees.

In a pot, place 2 cups berries, the sugar and lemon juice. Cook over low-med heat and mash berries. Add cornstarch (mixed with a little water) to berry mixture and stir constantly over heat till mixture becomes hot, bubbly and like a thick puree. Remove from heat and stir in remaining one cup of blueberries. Pour into pie shell and cover with top crust, pinching crusts together. Be sure to vent the pie.

Place onto cookie sheet to catch the drippings. I like to cover the edges with tinfoil to prevent them from burning. Cook pie for about 20 minutes or until golden. Remove tinfoil and cook approx another 10 minutes. *Serve warm.*
